Satkhira, Khulna, Bangladesh

SKILLS

- **Languages** : JavaScript, TypeScript, Go, C++
- **Frontend** : React.js, Next.js, Tailwind CSS, Redux Toolkit, Shadcn UI, Ant Design
- **Backend** : Golang, NestJS, REST APIs, gRPC, JWT Authentication, RBAC, Clean Architecture
- **Database/ORM** : PostgreSQL, PostGIS, MySQL, MongoDB, TypeORM
- **Tools & Concepts** : Docker, Git, GitLab, Postman, Swagger, AWS-S3, Webhooks

EXPERIENCE

Junior Software Engineer

November 2025 – Present

TechnoNext Software Ltd.

Dhaka, Bangladesh

- Architected decoupled backend microservices for [CarryBee](#) using **Golang & gRPC**, leveraging protocol buffers to enforce strict API contracts and reduce network serialization overhead.
- Implemented goroutines and concurrency patterns, optimizing parallel service execution and throughput.
- Structured a scalable location hierarchy (City > Zone > Area > Sector) to support complex regional routing.
- Optimized complex **PostgreSQL + PostGIS** geospatial queries (delivery zones, polygon validation, spatial intersections), reducing query latency for spatial data.
- Diagnosed and resolved critical production bottlenecks, improving API service reliability and system uptime.
- Containerized microservices using **Docker** and managed CI/CD version control workflows via **GitLab**.
- Collaborated closely with frontend team using Next.js to deliver end-to-end features.

Junior Software Engineer

November 2024 – October 2025

Easital Technologies Ltd.

Dhaka, Bangladesh

- Architected relational database schemas and technical flow diagrams to align cross-functional teams
- Developed key features for a community based webservice, [AdventCircle](#) including service pages, event systems, news modules, profile and settings systems, wishlist and shopping cart functionality.
- Contributed to the development of marketplace based [PackMyCode](#) discussion forum.
- Redesigned the [CallDone.AI](#)'s SaaS platform including core dashboard and landing page to optimize usability.
- Developed backend services for **INews ThemeForest** Project → JWT Authentication, Role based access control.
- Built AI-powered voice appointment setter using **Vapi**, **Make**, **Twilio**, **GoHighLevel** and **Calendly** integration.
- Designed relational databases, software documentation, and system flow diagrams.

Industrial Attachment

October 2024 - November 2024

Brain Station 23

Dhaka, Bangladesh

- Gained hands-on experience with the **SDLC**.
- Practiced Agile methodologies and collaborative development workflows.
- Applied verification and validation processes in development.
- Worked with React.js project structure and best practices.

PROJECTS

- **MediDhaka** [\[frontend\]](#)[\[backend\]](#)[\[video\]](#):
Tech Stack: Next.js, TypeScript, Redux Toolkit, Golang, REST APIs
Full-stack healthcare management platform for hospitals and doctors.
 - Built a responsive frontend using Next.js with state management via Redux Toolkit.
 - Developed RESTful backend services in Golang for hospital and doctor management.
 - Designed system workflows for managing healthcare entities and dashboards.

- **Portfolio Platform** [[github](#)] [[live](#)]:
Tech Stack: Next.js, TypeScript, Tailwind CSS, MDX, Framer Motion, Resend, Zod, Husky
Full-stack developer portfolio featuring blog support, dark mode, internationalization, and contact functionality.
 - Built a responsive, SEO-friendly personal portfolio showcasing projects, skills, and experience.
 - Implemented i18n with automatic locale detection, MDX with syntax highlighting and reading time.
 - Added dark/light mode, smooth UI animations, and contact form with email delivery using Resend.
- **Career Craft** [[github](#)] [[live](#)]:
Tech Stack: React.js, Tailwind CSS
Job portal web application for job browsing and applications.
 - Built a responsive UI with React.js and Tailwind CSS.
 - Implemented job listing, filtering, and application workflows.
 - Designed user-friendly interface for job discovery and interaction.
- **AI Voice Agent (Appointment Setter)** [[Video](#)]:
Tech Stack: Vapi, Make, Twilio, Google Calendar, GoHighLevel
AI-powered appointment scheduling system for automated booking and availability handling.
 - Integrated AI voice agent with scheduling and calendar systems.
 - Built workflow automation using webhooks and third-party APIs.
- **JobQueryAI** [[video](#)][[Github](#)]:
Tech Stack: Flask, Selenium, Llama 3.2
AI-based job insight system using scraped LinkedIn job data.
 - Built job data pipeline using Selenium scraping.
 - Developed LLM-based Q&A system for job insights.

PROBLEM-SOLVING ACTIVITIES

- Participated ICPC Asia Dhaka Regional Site Online Preliminary Contest - 2022, 2023
- Participated UGV Programming Contest-2019 Hosted by University of Global Village
- Participated GSTU Intra University Programming Contest - 2023
- **2nd position** of GSTU Intra University Project Exhibition - 2023
- **President** at GSTU Web Development Club - 2023
- Solved **800+** problems on Codeforces ([shajib_2k19](#)), Codechef ([Md Shajib](#)), Leetcode ([Md-Shajib](#))

PUBLICATIONS

- Published in Elsevier journal Data in Brief (2026)
- DOI: <https://doi.org/10.1016/j.dib.2026.112700>
- Designed and curated a demographically enriched handwritten Bangla dataset for early writer recognition
- Built and validated a structured ML-ready dataset pipeline including data collection, preprocessing, labeling, and benchmarking support.

EDUCATION

- **B.Sc in Computer Science and Engineering** Jan 2019 – Sep 2024
Gopalganj Science and Technology University
